

Add on options:

Vitamin D3 **\$15**

Vitamin D is important for bone and immune health. Supplementation can improve fatigue. Dosage of 50,000IU given intramuscularly can be given weekly or as directed by your provider. Given IM.

Vitamin B12 **\$15**

Vitamin B12 plays an important role in several metabolic functions. B12 supplementation can boost energy and improve concentration. Intramuscular injection can be given monthly or as directed by your provider. Can be given IM or added to IV hydration bag.

Vitamin C **\$15**

Vitamin C supports the immune system and functions as an antioxidant to fight free radicals. Can be added to IV hydration bag.

IV Vitamin Options

IV Vitamin Therapy Overview

IV Vitamin Drip is a specific type of IV therapy that efficiently administers vitamins, minerals and hydration to the body through an IV drip.

How IV Therapy Works:

- The body immediately absorbs vitamins and other essential nutrients when they are delivered directly into the bloodstream.
- IV Treatments offer almost 100% absorption of nutrients.
- The most significant benefit of IV therapy is its ability to hydrate your body and boost your immune system.

Immunity Boost \$145

Contains B complex, vitamin C and zinc. This provides a boost to the immune system and can also improve fatigue. Customizable dose.

Get Up and Go \$125

Contains B complex and a blend of amino acids. This can help reduce fatigue, muscle aches and brain fog and enhance immune health and metabolism. Customizable dose.

Myers' Cocktail \$145

Contains magnesium, calcium, B complex, B12 and vitamin C. This cocktail can help fight free radicals that damage cells and cause illness. It can also improve fatigue, physical performance and general wellbeing. Cannot be given with certain blood pressure medications*

Inner Beauty \$145

Contains B complex, vitamin C and biotin. This can enhance your natural glow and reduce wrinkles. Also fortifies hair, skin and nails. Customizable dose.

Glutathione \$45

This is a natural antioxidant made of multiple amino acids that can strengthen immune function, reduce inflammation, eliminate free radicals from the body and improve the overall appearance of the skin. This can be given alone or after one of the above IV drips. Customizable dose. Cannot be given if sulfa allergy*
